Notes:

¹ Measured in feet relative to the North American Vertical Datum of 1988 (NAVD88). To convert from NAVD88 to the National Geodetic Vertical Datum of 1929 in St. Tammany Parish, add 0.09 feet.

² Range estimated from surveyed, surge-only High Water Marks. Local wave effects (wave heights and wave runoff) are not included in these elevations.

³ Each whole-foot ABFE shown applies to all properties located in the mapped zone, with zone boundaries outlined in yellow. ABFEs north and west of I-10 reflect freeboard of 1 foot above current, effective Base Flood Elevations (BFEs), and ABFEs south and east of I-10 reflect freeboard of 4 feet above, current, effective BFEs shown on each community's Flood Insurance Rate Map (FIRM).
